***TerraBioGen LCFX* launched for the Greenhouse Vegetable Market**

Vancouver, Canada, November 9, 2015

TerraBioGen Technologies Inc., a developer of proprietary high-value agriculturally bioactive products, announces that it has launched ***TerraBioGen LCFX*** which is specifically formulated for the commercial greenhouse vegetable market.

TerraBioGen has spent several years developing its technology and has validated performance through trials conducted in Canada, the US and the UK. The ***TerraBioGen LCFX*** formulation provides a dramatic improvement in root architecture and plant health, and has shown a statistically significant increase in crop yield based on growing trials.

“We are extremely pleased with the performance of TerraBioGen LCFX. During greenhouse vegetable trials, we exceeded growers yield improvement expectations by several times.” said TerraBioGen’s CEO, Blair Heffelfinger.

About TerraBioGen

TerraBioGen Technologies Inc. has developed technologies for the production of innovative, high value, environmentally progressive agricultural and horticultural bio-products that improve crop health and yields, and suppress crop disease. The Company is committed to research and development to continue to improve the effectiveness of its technologies, the quality of its products, and the creation of new product lines. Further, the Company is taking steps to secure intellectual property rights to these active ingredients and to formulate them in order to fully commercialize their potential.
